

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

**1 (currently amended).** A highchair, comprising:

a base portion;

a seat portion; and

a pneumatic cylinder lifting means, wherein both ends of the lifting means are connected to the base portion and the seat portion, respectively,

wherein the base portion is connected to the lifting means by a retaining clip and a fixing block, the other end of the lifting means is connected to the seat portion by a pivoting device so that the lifting means can pivotally rotate into a folded and horizontal position with respect to the seat portion by 90 degrees.

**2 (cancelled).**

**3 (currently amended).** The highchair according to claim [[2]] 1, wherein the pivoting device comprises an outer button, an inner button, a button spring, a connecting piece and a seat cover.

**4 (original).** The highchair according to claim 3, wherein the lifting means can pivotally rotate into a folded and horizontal position with respect to the seat portion by pressing the inner buttons and outer buttons.

**5 (withdrawn).** A highchair, comprising:

a seat portion having a body and a pair of attaching sections fixedly provided on both sides of the body;

a pair of leg frames on both sides of the seat portion; and

a pneumatic cylinder lifting means with two ends thereof connected to the seat body and the lower end of the leg frame.

**6 (withdrawn).** The highchair according to claim 5, wherein each attaching section is a sliding sleeve provided with a sliding slot therein.

**7 (withdrawn).** The highchair according to claim 5, wherein the pneumatic cylinder is parallel to the leg frame.
